### Multi colour Circular coil Necklace, Ear Ring & Finger Ring

Pendant - Join strips (Refer to basic shapes section 18) and make a tight coil (Refer to basic shapes section 1). Apply GLUE generously as shown so that the coil doesn't fall apart. When the GLUE is still wet with the back side of the quilling tool move it on the coil in a circular direction by applying a little pressure to get the dome shape. Make a ring tight coil (Refer to basic shapes section. 17) and stick it on the edge of the pendant, it will work as a hook. Make different color ring tight coils. Now take a thread (given in the kit) and pass it through the hook we made and put the colorful coils on both the sides. Please note that its very important, that the last coils that you put on both the sides make them a tight coil (Refer to basic shapes section. 1) otherwise the 'S' hook or chain will pass through the open ring coil. Attach one side of the thread to a piece of chain (so that you can adjust the length) and the other to a round ring (kadi). Attach a 'S' hook to the ring (kadi).

Make earrings and finger ring using the same procedure to give it a dome shape look. For earring pass the earring hook through the round ring (kadi) and attach it to the tight coil.

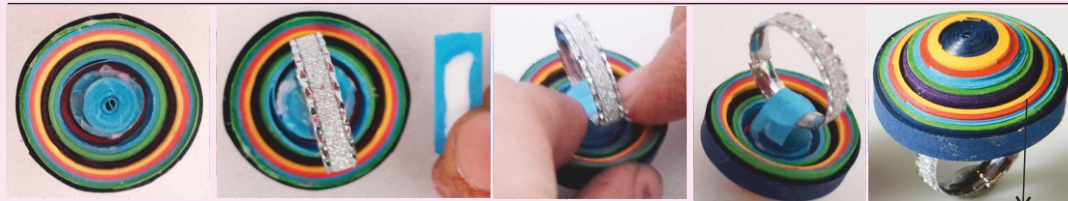

For finger ring apply glue on the back side to stick a tight coil to raise the surface and then apply glue on the tight coil and place the ring. Take a piece of paper, apply glue on it and stick it on the ring (as shown) to give an extra support to the ring. Let it dry before wearing it.
